

The solar eclipse has inspired the design of the Eclipse lamp thanks to its two light sources direct and indirect, they can be used separately, simulating the magic of this natural phenomenon. The "cone of shadow" is made possible by the presence of a metal disc placed at the beginning of the largest aluminum dome that, hiding the light source, it generates a bright ring. Translucent Plexiglas hanging, suspended by a thin red wire, is illuminated through a narrow cone of light that draws the shapes. The light intensity can be adjustable by a dimmer. The product is equipped with multi switches to achieve different lighting scenarios.

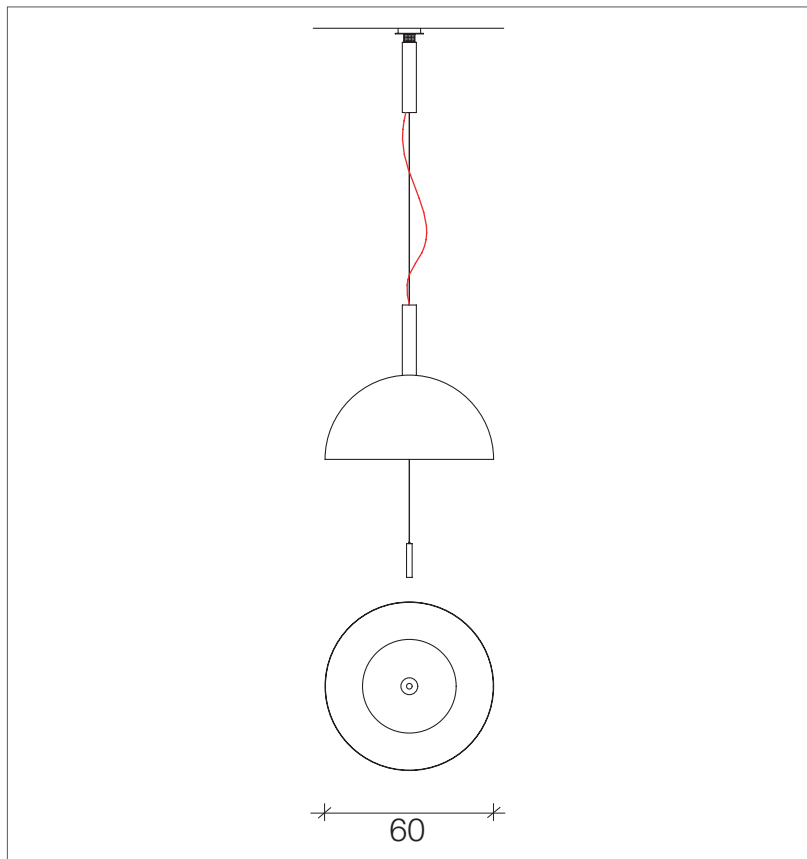

DESCRIPTION

Suspension lamp with direct and indirect light.  
Painted metal structure.  
Aluminum dome lampshade.  
Metallic disc and Plexiglas pendant.  
Red decorative electric cable.
